

VALLEY PROTEINS, INC.

VP EZ UCO Recovery Systems

Never worry about used cooking oil again with **VP EZ UCO Recovery & Recycling Systems**. Our indoor system provides a safe, clean and easy method to handle your waste fryer oil. The system can be configured with fryers that have a waste oil management option or fryers that have an oil filtering system.

VP EZ UCO Recovery & Recycling Systems allow Valley Proteins, Inc. to service the tank quickly and without interruption to your business. We simply attach the suction hose from our tanker truck to a small, secure outlet pipe located on an exterior wall of your restaurant and transfer the oil directly into our truck.

VP EZ UCO Recovery & Recycling Systems offer safety, security and convenience.

- Employees do not need to leave the building at night
- Eliminates dangerous oil spills in parking lots where patrons and employees can slip and fall
- Reduces theft and vandalism on restaurant property
- Allows for easy monitoring of oil levels, ensuring timely service calls
- Pick-up does not require entry into the building
- Recycling grease is as simple as pushing a button

Oil Recycling Just Got **EZer.**

VP EZ UCO Recovery & Recycling Systems can be connected directly to a fryer, or an existing oil transfer system using a wand attachment. Either way, with the simple push of a button, the oil is quickly, and efficiently, pumped into the tank in just a matter of minutes.

Key components of VP EZ UCO Recovery & Recycling Systems:

- Designed to go in existing, remodeled or new stores
- Configured with direct connection to:
 - fryer models with a waste oil management option or bulk oil disposal option
 - filter machines and/or built-in filtering units, or use of a VP caddy
- Offers simple one-button operation
- Made with solid, molded one-piece construction (tank and legs)
- Designed with modular parts
- Features a premium roller pump vs. a geared pump
- Equipped with automatic timer for pump shut off
- Monitored wirelessly for smooth system operation
- Generates automated service ticket when tank reaches 85% capacity
- ETL-certified
- Approved by local health departments
